

In February of 2008 The Village of Lincolnwood requested proposals for installation and testing of RPZ valves for use by residential customers. The Village of Buffalo Grove, as part of an intergovernmental co operational effort requested the results of the R.F.P. The following Tables expresses the cost for a Reduced Pressure Zone type backflow device, which is required to be installed on all lawn irrigation systems within the Village of Buffalo Grove. The table also contains the cost per hour for labor to install such a device as well as the cost of the yearly mandated testing. The Village of Buffalo Grove is providing this information to residents in an effort to help them manage the cost of installation and yearly testing of these devices. As always the Village advocates calling several vendors in an effort to get the best price available. In addition to the following chart a list of Certified Backflow Prevention testers can be requested from the Village of Buffalo Grove Public Works Department (847-459-2545).

***Cross Connection Control Proposal Data
As Compiled By the Village of Lincolnwood***

Date: 2/29/08
